LeetCode

Summary

Computer Science student pursuing an Integrated Dual Degree in CSE and AI, with experience building software and AI systems across embedded, web, and data-intensive applications. Proficient in Python and C++, with hands-on experience in React, Node.js, MongoDB, Docker, and machine learning. Strong foundation in data structures, algorithms, OOP, DBMS, and operating systems, with a focus on building reliable, practical solutions.

Education

Rajiv Gandhi Institute of Petroleum Technology (RGIPT) — Bengaluru, Karnataka
Institution of National Importance, akin to the IITs
Integrated Dual Degree — B.Tech CSE + M.Tech Artificial Intelligence — Sep 2022 – Apr 2027
CGPA: 7.59

Experience

- **Hypertangent Technologies – Indian Institute of Technology Delhi** — *New Delhi, India*
  Machine Learning Intern — May 2025 – Jul 2025
  - Engineered an embedded ML pipeline for an ESP32-based safety system, processing IMU, magnetometer, and barometer data to classify five work-at-height activities at 20 Hz.
  - Optimized and deployed Random Forest and Isolation Forest models in C++ for on-device inference, achieving 85% accuracy and enabling real-time activity recognition, anomaly detection, and safety alerts.

- **National Institute of Technology Patna** — *Patna, India*
  Research Intern — May 2025 – Jul 2025
  - Built an end-to-end satellite imagery classification pipeline using XGBoost, Random Forest and 1D-CNN to classify nine land-cover categories, achieving up to 96.50% accuracy.
  - Fused Sentinel-1A SAR and Sentinel-2B optical data, preprocessing heterogeneous sensor data and generating high-resolution land-cover maps for visualization.

Projects

- **Drip.AI - Women's AI Fashion Stylist**
  - **Technologies used:** Python, Streamlit, FashionCLIP, Qwen2.5-VL-3B, MongoDB Atlas, Docker, Recommendation Systems
  - Designed an AI fashion recommendation system leveraging FashionCLIP for garment understanding and Qwen2.5-VL for multimodal outfit analysis, enabling personalized styling and outfit critique.
  - Engineered an intelligent retrieval pipeline on 9,000+ products using MongoDB Atlas, generating context-aware outfit recommendations based on persona, color theory, and occasion.
- **Cervical Cancer Detection (Pap Test)**
  - **Technologies used:** Python, TensorFlow, Keras, OpenCV, NumPy, Pandas, Transfer Learning, Federated Learning
  - Developed a deep learning model for cervical cancer detection from Pap smear images using Transfer Learning, achieving around 90 % accuracy.
  - Implemented Federated Learning (FedAvg) to enable privacy-preserving decentralized training without sharing sensitive medical data.

Technical Skills

Programming Languages: Python, C++, JavaScript, HTML/CSS

Frameworks Libraries: React, Node.js, Tensorflow, Pytorch, Scikit-learn, Transformers, OpenCV

Databases & Tools: MongoDB, Git, Docker, Google Colab, Jupyter, VS Code

Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, Computer Architecture

AI/ML: Machine Learning, Deep Learning, Computer Vision, Recommendation Systems, Federated Learning

Achievements

- **Winner, Smart India Hackathon 2024**: Secured 1st place nationally for developing a Blockchain & Cybersecurity solution under the NTRO ministry challenge.
- **Women Who Master Hackathon 2026** | Selected for and participated individually in the Zonal Round.
- **Global Nominee, NASA Space Apps Challenge 2025**: Selected among the top global nominees for the international stage of the world's largest annual hackathon.
- **PRMO Qualified**: Qualified the Pre-Regional Mathematical Olympiad (PRMO), the first stage of the Indian Mathematical Olympiad Programme.
